Notes – the database is a SQL Server 2005 Express Edition server:

- SQL Server 2005 Express Edition requires the .NET Framework 2.0. Before installing SQL Server 2005 Express Edition, you must download and install the .NET Framework 2.0 from this Microsoft Web site.
- SQL Server 2005 does not support the Banyan VINES Sequenced Packet protocol (SPP), Multiprotocol, AppleTalk, or NWLink IPX/SPX network protocols. Clients previously connecting with these protocols must select a different protocol to connect to SQL Server 2005 such as TCP/IP or Named Pipes.
- SQL Server 2005 software works on the hardware certified for use with the Microsoft Windows operating system.
- Actual requirements will vary based on your system configuration and the applications and features you choose to install. Additional available hard-disk space may be required.
- SQL Server 2005 Express Edition will also run on Microsoft Windows Server 2003 64-bit x64 Standard, Enterprise, or Datacenter edition with Service Pack 1 or later running in Windows on Windows.
